

Technical Bulletin 012 – Zero 2000 MSA & FIA Kit Content and Spares

Rev2 07/12/2015

The tables below detail the contents of our Zero 2000 MSA and FIA plumbed-in systems Fitting Kits. Most items are available as spares or for if you have an installation which requires additional components. Please speak to Lifeline Technical for advice on installations using additional components; although these do not normally invalidate homologation, it is possible to do so inadvertently. The extinguisher supplied with a complete system can be purchased separately by substituting the “-K” suffix of the system part number for “-B”
